Contents of Volume 273

Vol. 273 Nos. 1–4 **March 25, 2003**

Hydrological characterisation of pesticide loads using hydrograph separation at different scales in a German catchment
K. Müller, M. Deurer, H. Hartmann, M. Bach, M. Spiteller and H.-G. Frede 1
Geomorphology-based artificial neural networks (GANNs) for estimation of direct runoff over watersheds
Bin Zhang and Rao S. Govindaraju 18
A fully probabilistic approach to extreme rainfall modeling
Stuart Coles, Luis Raúl Pericchi and Scott Sisson 35
Soil and karst aquifer hydrological controls on the geochemical evolution of speleothem-forming drip waters, Crag Cave, southwest Ireland
Anna F. Tooth and Ian J. Fairchild 51
Simulation of 6-hourly rainfall and temperature by two resampling schemes
R. Wójcik and T.A. Buishand 69
A simple water balance modelling approach for determining water availability in an irrigation tank cascade system
C.J. Jayatilaka, R. Sakthivadivel, Y. Shinogi, I.W. Makin and P. Witharana 81
Monitoring present day climatic conditions in tropical caves using an Environmental Data Acquisition System (EDAS)
Francis Sondag, Michel van Ruymbeke, François Soubiès, Roberto Santos, André Somerhausen, Alexandre Seidel and Paulo Boggiani 103
A mixed groundwater system at Midway, UT: discriminating superimposed local and regional discharge
Concepción Carreón-Diazconti, Stephen T. Nelson, Alan L. Mayo, David G. Tingey and Maren Smith 119
Simulating surface and subsurface initiation of macropore flow
Markus Weiler and Felix Naef 139
The vadose flow above Soreq Cave, Israel: a tritium study of the cave waters
Aaron Kaufman, Miryam Bar-Matthews, Avner Ayalon and Israel Carmi 155
Parameter uncertainty and the significance of simulated land use change effects
Klaus Eckhardt, Lutz Breuer and Hans-Georg Frede 164
Predicting fish passage design flows at ungaged streams in eastern Washington
Erik R. Rowland, Rollin H. Hotchkiss and Michael E. Barber 177
Transient modeling of regional groundwater flow using parameter estimates from steady-state automatic calibration
Torben O. Sonnenborg, Britt S.B. Christensen, Per Nyegaard, Hans Jørgen Henriksen and Jens Christian Refsgaard 188
The use of stream flow routing for direct channel precipitation with isotopically-based hydrograph separations: the role of new water in stormflow generation
Carl E. Renshaw, Xiahong Feng, Kelsey J. Sinclair and Raymond H. Dums 205
Solute dynamics in the bed sediments of a stormwater infiltration basin
T. Datry, F. Malard, L. Vitry, F. Hervant and J. Gibert 217
Determining the soil hydraulic conductivity by means of a field scale internal drainage
Gerardo Severino, Alessandro Santini and Angelo Sommella 234
Estimating soil solution electrical conductivity from time domain reflectometry measurements using neural networks
Magnus Persson and Cintia Bertacchi Uvo 249

PII: S0022-1694(03)00032-5
